| Tenth             | JOE I. JENKINS<br>March 18, 1941—July 1, 1943.        | Hartwell      |

---

OFFICERS OF THE REGENTS

|                    |                   |
|--------------------|-------------------|
| Chairman.....      | Sandy Beaver      |
| Vice-Chairman..... | E. Ormonde Hunter |
| Chancellor.....    | S. V. Sanford     |
| Secretary.....     | L. R. Siebert     |
| Treasurer.....     | W. Wilson Noyes   |

## FACULTY

GEORGE LOMBARD KELLY, B.A., B.S. Med., M.D., *Dean*

## EMERITUS PROFESSORS

Office Address

- WILLIAM HENRY GOODRICH, B.A. (Ga. '93),  
M.D., (Ga. '97).....University Hospital  
*Professor Emeritus of Clinical Gynecology*
- WILLIAM ANTHONY MULHERIN, B.A. (Spring Hill '91),  
M.A. (Spring Hill '00), M.D. (Harvard '01),  
D.Sc. (Ga. '27).....1211 Greene Street  
*Professor Emeritus of Clinical Pediatrics*

## PROFESSORS

- JOSEPH AKERMAN, B.A. (Ga. '94),  
M.D. (Hopkins '00).....831 Fifteenth Street  
*Professor of Obstetrics*
- CLAUDE MCKINLEY BURPEE, B.S. Med. (Ga. '20),  
M.D. (Ga. '22).....University Hospital  
*Professor of Pediatrics*
- HERVEY MILTON CLECKLEY, B.S. (Ga. '24),  
B.A. (Oxford '26), M.D. (Ga. '29).....University Hospital  
*Professor of Neuropsychiatry*
- ROBERT BENJAMIN GREENBLATT, B.A. (McGill '28),  
M.D. (McGill '32).....School of Medicine  
*Professor of Experimental Medicine*
- WILLIAM FERGUSON HAMILTON, B.A. (Pomona '17),  
Ph.D. (Cal. '21) .....School of Medicine  
*Professor of Physiology and Pharmacology*
- GEORGE LOMBARD KELLY, B.A. (Ga. '11),  
B.S. Med. (Ga. '22), M.D. (Ga. '24).....School of Medicine  
*Professor of Gross Anatomy*
- JOSEPH KRAFKA, JR., B.A. (Lake Forest '14), M.A. (Lake  
Forest '15), Ph.D. (Ill. '19), M.D. (Ga. '33).....School of Medicine  
*Professor of Microscopic Anatomy*
- CARLTON HOWARD MARYOTT, B.A. (Brown '04),  
Ph.D. (Yale '11).....School of Medicine  
*Professor of Chemistry*
- \*FRED ALBERT METTLER, B.A. (Clark '29), M.S.  
(Cornell '31), Ph.D. (Cornell '33),  
M.D. (Ga. '37).....School of Medicine  
*Professor of Gross Anatomy*

\*On leave of absence 1941-42, New York Neurological Institute.

- EDGAR RUDOLPH PUND, B.A. (Ga. '14),  
M.D. (Ga. '18).....School of Medicine  
*Professor of Pathology*
- EVERETT S. SANDERSON, B.S. (Mass. State '16), M. S. (Yale  
'21) Ph.D. (Yale '22), M.D. (Wash. '34).....School of Medicine  
*Professor of Bacteriology and Public Health*
- JOHN HAYS SHERMAN, B.S.Med. (Ga. '20),  
M.D. (Ga. '23).....University Hospital  
*Professor of Surgery*
- \*RICHARD FRANKLIN SLAUGHTER,  
B.S. (Richmond '27), M.D. (Va. '30)  
*Professor of Neurologic Surgery*
- VIRGIL PRESTON SYDENSTRICKER, B.A. (W. & L. '10),  
M.A. (W. & L. '11), M.D. (Hopkins '15).....University Hospital  
*Professor of Medicine*
- LUCIUS NEWTON TODD, M.D. (Ga. '15).....University Hospital  
*Professor of Tuberculosis*
- RICHARD TORPIN, A.B. (Neb. Wesleyan '13), S.B.  
(Chicago '15), M.D. (Rush Med. '17).....University Hospital  
*Professor of Obstetrics and Gynecology*
- PERRY PAUL VOLPITTO, B.S. (Wash. & Jefferson '28),  
M.D. (Western Reserve '33).....University Hospital  
*Professor of Anesthesiology*
- ROBERT ARTHUR WOODBURY, B.S. (Kan. '24),  
M.S. (Kan. '28), Ph.D. (Kan. '31),  
M.D. (Chicago '34).....School of Medicine  
*Professor of Pharmacology*

## CLINICAL PROFESSORS

- WILLIAM WHATLEY BATTEY, M.A. (Belmont Abbey '00),  
M.D. (Ga. '04).....561 Telfair Street  
*Professor of Clinical Surgery*
- GUY TALMADGE BERNARD, M.D. (Ga. '07).....204 Thirteenth Street  
*Professor of Clinical Dermatology and Oncology*
- CHARLES IVERSON BRYANS, M.D. (Ga. '04).....S. F. C. Building  
*Professor of Clinical Ophthalmology and Oto-Laryngology*
- RALPH HILL CHANEY, B.A. (Oberlin '09), M.A.  
(Oberlin '13), M.D. (Pa. '14).....1001 Greene Street  
*Professor of Clinical Surgery*
- WARREN COLEMAN, A.B. (Transylvania '88), A.M. Hon.  
(Transylvania '99), M.D. (N.Y. '91).....University Hospital  
*Professor of Clinical Medicine*
- WILLIAM JOHNSTON CRANSTON, M.D. (Ga. '08).....1345 Greene Street  
*Professor of Clinical Medicine*

\*Deceased, July 4, 1941.

- LYSANDER PALMER HOLMES, M.D. (Vanderbilt '12).....S. F. C. Building  
*Professor of Clinical Roentgenology*
- ANDREW JONES KILPATRICK, M.D. (Ga. '96).....407 Seventh Street  
*Professor of Clinical Obstetrics*
- SAMUEL JOSEPH LEWIS, M.D. (Ga. '11).....S. F. C. Building  
*Professor of Clinical Ophthalmology and Oto-Laryngology*
- HENRY MIDDLETON MICHEL, M.D. (Ga. '98).....S. F. C. Building  
*Professor of Clinical Orthopedic Surgery*
- EUGENE EDMUND MURPHEY, M.D. (Ga. '98).....432 Telfair Street  
*Professor of Clinical Medicine and Lecturer in Preventive Medicine*
- ROBERT LEWIS RHODES, B.A. (Emory '06),  
 M.D. (Hopkins '10).....S. F. C. Building  
*Professor of Clinical Surgery*
- JOSEPH RIGHTON ROBERTSON, M.D. (Md. '10).....1345 Greene Street  
*Professor of Clinical Urology*
- \*GEORGE ALBERT TRAYLOR, B.S. (Furman '00),  
 M.D. (Ga. '04).  
*Professor of Clinical Surgery*
- EVERARD ANSLEY WILCOX, B.S. (Davidson '07),  
 M.A. (Davidson '09), M.D. (Ga. '10).....1345 Greene Street  
*Professor of Clinical Gynecology*

#### ASSOCIATE PROFESSORS

- LANE HARRIS ALLEN, B.S. (Ga. '30), M.S. (Ga. '32),  
 Ph.D. (Georgetown '35), M.D. (Ga. '39).....School of Medicine  
*Associate Professor of Gross Anatomy*
- ALFRED POYNEER BRIGGS, B.S. (Col. '12),  
 M.D. (Wash. '22).....School of Medicine  
*Associate Professor of Biochemistry and Medicine*
- ROBERT BARTON DIENST, B.A. (Baylor '25), M.A.  
 (Baylor '26), Ph.D. (Chicago '33).....School of Medicine  
*Associate Professor of Bacteriology and Public Health*
- PHILIP DOW, B.S. (Mich. '27),  
 Ph.D. (Yale '35).....School of Medicine  
*Associate Professor of Physiology and Pharmacology*
- CHARLES GOODRICH HENRY, B.A. (Ga. '23),  
 M.D. (Ga. '28).....University Hospital  
*Associate Professor of Surgery*

#### ASSOCIATE CLINICAL PROFESSORS

- JAMES HARVEY BUTLER, M.D. (Ga. '14).....S. F. C. Building  
*Associate Professor of Clinical Medicine*
- ALBERT ALONZO DAVIDSON, M.D. (Vanderbilt '93).....1116 Greene Street  
*Associate Professor of Clinical Medicine*

\*Deceased, September 15, 1941.

- JOHN WILLIAM THURMOND, M.D. (Ga. '26).....407 Seventh Street  
*Associate Professor of Clinical Obstetrics*
- ANDREW AUGUSTUS WALDEN, M.D. (Medico-Chir.,  
 Phila. '02).....508 Carolina Avenue  
*Associate Professor of Clinical Medicine*
- PETER BURUM WRIGHT, M.D. (Ga. '20).....1345 Greene Street  
*Associate Professor of Clinical Orthopedic Surgery*

### ASSISTANT PROFESSORS

- BENEDICT ERNEST ABREU, B.S. (Cal. '35),  
 M.S. (Cal. '37), Ph.D. (Cal. '39).....School of Medicine  
*Assistant Professor of Pharmacology*
- WILLIAM FIELDER ALEXANDER, B.S. (Knox. '33),  
 M.S. (St. Louis '37), Ph.D. (St. Louis '39).....School of Medicine  
*Assistant Professor of Gross Anatomy*
- STEWART HART AUERBACH, A.B. (Ala. '31),  
 M.D. (Ga. '34).....School of Medicine  
*Assistant Professor of Pathology*
- LESTER LLEWELLYN BOWLES, A.B. (Franklin '34),  
 M.D. (Indiana '38).....School of Medicine  
*Assistant Professor of Microscopic Anatomy*
- ENCIL MORTON BRADLEY, B.A. (Wis. '33),  
 Ph.D. (Rochester '38).....School of Medicine  
*Assistant Professor of Gross Anatomy*
- WILLIAM RAGLAND BROWN, B.A. (Mercer '31),  
 M.S. (Cin. '32), Ph.D. (Cin. '34).....School of Medicine  
*Assistant Professor of Chemistry*
- ROY EDWIN BUTLER, A.B. (Mich. '24), M.D. (Mich. '30).....School of Medicine  
*Assistant Professor of Medicine*
- HARRY TAYLOR HARPER, JR., M.D. (Emory '33).....S.F.C. Building  
*Assistant Professor of Medicine*
- FRANK LANSING LEE, B.S. Med. (Ga. '19), M.D. (Ga. '21).....S.F.C. Building  
*Assistant Professor of Medicine*
- HENRY GETZEN MEALING, B.S. (Ga. '20),  
 M.D. (Ga. '22).....S. F. C. Building  
*Assistant Professor of Medicine*
- \*CECILIA C. METTLER, A.B. (College of St. Elizabeth '31), B. Ed.  
 College of St. Elizabeth, '31), A.M. (Cornell '32),  
 Ph.D. (Cornell '38).....School of Medicine  
*Assistant Professor of History of Medicine*
- CHARLES ROBERT NOBACK, B.S. (Cornell '36),  
 M.S. (N.Y. '38).....School of Medicine  
*Assistant Professor of Microscopic Anatomy*

\*On leave of absence, 1941-42.

- \*HENRY LOUIS SCHMIDT, JR., B.S. (Ga. '31),  
 M.D. (Ga. '35).....University Hospital  
*Assistant Professor of Medicine*
- ROBERT HALL SHULER, B.S. (Hastings '35)  
 M.S. (Neb. '37), Ph.D. (Chicago '41).....School of Medicine  
*Assistant Professor of Physiology*
- SAM ALLEN SINGAL, B.S. (Toledo '36),  
 M.S. (Mich. '38), Ph.D. (Mich. '40).....School of Medicine  
*Assistant Professor of Chemistry and Research Fellow in Medicine*

#### ASSISTANT CLINICAL PROFESSORS

- MONTE PRESTON AGEE, M.D. (Ga. '21).....S. F. C. Building  
*Assistant Professor of Clinical Gynecology*
- JOHN WILKERSON BRITTINGHAM, Ph.B. (Georgetown '22),  
 M.A. (Georgetown '23), M.D. (Hopkins '27).....1345 Greene Street  
*Assistant Professor of Clinical Medicine*
- THOMAS WRIGHT GOODWIN, B.S. (Ga. '26),  
 M.D. (Ga. '30).....1345 Greene Street  
*Assistant Professor of Clinical Urology*
- JOSEPH DEWEY GRAY, M.D. (Ga. '20).....1345 Greene Street  
*Assistant Professor of Clinical Medicine*
- J. ZEB McDANIEL, A.B. (Davidson '27),  
 M.D. (Ga. '32).....1345 Greene Street  
*Assistant Professor of Clinical Urology*
- ROBERT CAREY MCGAHEE, B.S.Med. (Ga. '22),  
 M.D. (Ga. '24).....1345 Greene Street  
*Assistant Professor of Clinical Pediatrics*
- WALTER EUGENE MATTHEWS, M.D. (Ga. '30).....S. F. C. Building  
*Assistant Professor of Clinical Ophthalmology and Oto-Laryngology*
- PHILIP ANTHONY MULHERIN, M.D. (Ga. '30).....1211 Greene Street  
*Assistant Professor of Clinical Pediatrics*
- IRVINE PHINIZY, B.S. (Ga. '19), M.D. (Ga. '23).....S. F. C. Building  
*Assistant Professor of Clinical Medicine*
- WILLIAM H. ROBERTS, M.D. (Ga. '13).....828 Greene Street  
*Assistant Professor of Clinical Dermatology and Oncology*
- JULES VICTOR ROULE, JR., M.D. (Ga. '26).....S. F. C. Building  
*Assistant Professor of Clinical Ophthalmology and Oto-Laryngology*
- DAVID ROMULUS THOMAS, JR., B.S. (V. M. I. '26),  
 M.D. (Ga. '30).....S. F. C. Building  
*Assistant Professor of Clinical Medicine*
- CHARLES DOUGLAS WARD, B.S. (Ga. '15),  
 M.D. (Ga. '20).....1345 Greene Street  
*Assistant Professor of Clinical Surgery*

\*On active duty, U. S. Army.

- \*RICHARD BYNUM WEEKS, B.S. Med (Ga. '23),  
 M.D. (Ga. '25).....S. F. C. Building  
*Assistant Professor of Clinical Surgery*  
 GEORGE WASHINGTON WRIGHT, B.S. (Ga. '22),  
 M.D. (Ga. '26).....S. F. C. Building  
*Assistant Professor of Clinical Urology*

## CLINICAL ASSOCIATES

- HENRY PIERCE HARRELL, M.D. (Ga. '20).....S. F. C. Building  
*Associate in Clinical Pediatrics*  
 FRANCIS XAVIER MULHERIN, B.A. (Sacred  
 Heart '06), M.D. (Pa. '11).....1001 Greene Street  
*Associate in Clinical Pediatrics*

## CLINICAL INSTRUCTORS

- ‡ROBERT IRVIN BRYSON, M.D. (Ga. '09)  
*Instructor in Clinical Dermatology and Oncology*  
 REUBEN MAX REIFLER, Ph.D. (Ill. '26), B.S. (Ill. '35),  
 M.D. (Ill. '37).....School of Medicine  
*Instructor in Clinical Dermatology*

## LECTURERS

- ARCHIE L. HAGGERTY, D.V.M.....501 Greene Street  
*Lecturer in Milk and Meat Inspection*  
 \*FREEMAN C. MCCLURE, B.A. (Ga. '23),  
 L.L.B. (Ga. '26).....S. F. C. Building  
*Lecturer in Forensic Medicine*  
 ✓ THOMAS BURDELL PHINIZY, B.S. (Ga. '23),  
 M.D. (Ga. '28).....501 Greene Street  
*Lecturer in School Hygiene and Assistant in Clinical Medicine*

## CLINICAL ASSISTANTS

- COLDEN RHIND BATTEY, B.S. (Georgetown '21),  
 M.D. (Ga. '25).....921 Greene Street  
*Assistant in Clinical Surgery*  
 BYRON CLEVELAND BEARD, B.A. (Vanderbilt '36),

## ANNOUNCEMENTS FOR 1941-1942

The one hundred and eleventh session of the University of Georgia School of Medicine began September 27, 1941, and will end June 15, 1942.

The University of Georgia has grown in part by the creation of new departments, and in part by the absorption of certain already existing institutions founded independently, one of which was the Medical College of Georgia in Augusta, founded in 1828.

The absorption of the Medical College of Georgia began in 1873, when by mutual consent of the respective Boards of Trustees it became affiliated with the University as its Medical Department. This absorption was consummated in 1911. By special enactment of the Legislature the University took possession of the property and assumed control of the management of its Medical Department, which has since operated, like the other departments, under the laws and regulations of the University.

The state supported institutions of higher learning in Georgia were integrated into the University System of Georgia by legislative enactment at the regular session of the General Assembly in 1931. Under the articles of the Act all existent boards of trustees were abolished and control of the System vested in a board of regents which has all the power and rights of the former governing boards of the several institutions. Control of the System by the Board of Regents was effective January 1, 1932.

## DISCIPLINE AND GENERAL REGULATIONS

The State of Georgia extends the privileges of the University within the limits of its capacity to all persons who are qualified for admission. It is maintained at public expense for the public good. It cannot, however, be the patron of inefficiency, idleness, or dissipation. Its classes have no room except for those who diligently pursue the studies of their choice and are willing to be governed in their conduct by the rules of propriety. Every student owes to the public a full equivalent of expenditures in his behalf, both while in the institution and afterward.

The discipline of the School of Medicine is in the hands of the Dean and the Executive Committee. Formal regulations are few and general in character.

Regulations are formulated and recommended by a Student-Faculty Council. The Council acts as an advisory body in student and faculty relations.

The Student-Faculty Council is composed of five members of the Faculty and nine students. The pre-clinical and clinical departments are each represented by at least two members. They are elected by the

student body for a term of three years. The students are represented by two members from each class together with the president of the Student Body. Two student members are elected by the first-year class at the end of the first quarter and serve for a period of one scholastic year. Two permanent members are elected by the second-year class the first week of the scholastic year and serve until graduation. The committee meets four times a year—early in the scholastic year and near the end of each trimester. A chairman and secretary are elected by the committee for a term of one year.

### MEDICAL SCHOOL BUILDINGS

The School of Medicine is housed in three buildings, situated on the College campus covering about forty-five acres. It is near the geographical center, and about one mile from the business center of Augusta, and is easily accessible by bus from all parts of the city.

The ground floor of the Newton building provides quarters in the north end for the department of experimental medicine and in a portion of the south end for recreation rooms and a dining room for the students, known as the Alumni Tavern. On the second floor are located the administration offices, the library, and the clinical pathology laboratory. On the third and fourth floors are the departments of gross and microscopic anatomy and animal surgery, with an animal room containing fifty individual cement animal cages.

The Dugas Building erected during the 1936-37 session houses the department of physiology and pharmacology and the department of biochemistry, as well as an auditorium seating 360 persons. Funds for the erection of this building were provided by the Regents of the University System of Georgia and the Public Works Administration.

An additional Medical School building houses the departments of pathology and bacteriology and public health. This building was occupied in September, 1939, and funds were provided from the same sources as for the Dugas Building.

### HOSPITALS

The City of Augusta, in 1914, completed upon the school grounds and in immediate proximity to the school building a hospital plant especially designed as a teaching hospital for the School of Medicine, and known as the University Hospital. The buildings, equipped, cost over a half million dollars. They are of modern fire-proof construction, and are furnished throughout with standard appliances of the best material and design. Of the total of 400 beds and bassinets, approximately 200 are available without restriction for teaching purposes. This includes the Wilhenford tuberculosis unit.

UNIVERSITY OF GEORGIA SCHOOL OF MEDICINE

DUGAS BUILDING, UNIVERSITY OF GEORGIA SCHOOL OF MEDICINE

In 1934, a two-story addition to the University Hospital, named the Milton Antony Wing after the founder of the School of Medicine, was completed. Funds for the erection of this building were contributed by the Federal Public Works Administration, the Alumni Association of the School of Medicine, the City of Augusta and the County of Richmond. The first floor of this building houses the out-patient department, while the second floor is a contagious disease hospital.

The University Hospital is maintained by the City of Augusta. The exclusive medical and surgical control of the Hospital is vested in the University of Georgia School of Medicine. The attending staff is composed of the members of the faculty of the School of Medicine, thus assuring a proper use of the clinical material of the hospital for purposes of teaching.

In June 1937, \$200,000 was made available through a bond issue to expand and renovate the University Hospital plant. This amount will be increased at least fifty per cent by Federal grants. Construction made possible by these funds is still under way.

The Georgia State School for Mentally Defective Children, which is operated by the State Board of Control, is located about ten miles from Augusta, and provides occasional demonstrations in the study of pediatric psychiatry.

#### CLINICAL OPPORTUNITIES

The University has medical and surgical control of the charity patients of the City of Augusta. The Out-Patient Department of the University Hospital is housed on the first floor of the Milton Antony Wing of the Hospital and has a large attendance, averaging about two hundred and twenty patients a day. A wealth of teaching material is derived from this source. Clinics are held daily by members of the out-patient staff.

Patients occupying free beds in the University Hospital and the Wilhenford tuberculosis unit are used as teaching material. Hospital patients are examined by fourth-year students who record the physical and laboratory findings on the patients' charts. Hospital patients are also used for demonstrations in the course in physical diagnosis in the second year.

A course in domiciliary medicine is given to the fourth-year students whose work in the patients' homes is directly supervised by special instructors employed for this purpose. The students examine these patients thoroughly and assist in their treatment which is supervised by the special instructors. This work is not only a source of great benefit to the student, but is also of great help to the patient, who in this way receives more thorough care than would otherwise be possible. It is unnecessary to

emphasize the opportunity that the student has in this course to study medicine at the bedside and to gain practical knowledge of the manner of handling patients in the home.

### AUTOPSIES

The City Morgue with specially designed autopsy and cold storage room occupies space in the University Hospital. A new autopsy room has been added in the building occupied September, 1939. Students and Staff attend autopsies which are conducted by the staff in pathology. About 150 autopsies are done annually.

### LIBRARY

The Library is located in the south wing of the school building, in quarters that afford retirement, ample room and good light. The space formerly occupied by the department of bacteriology provides accommodation for a large reading room. The Library is open from nine a.m. to six p.m., except Saturdays, when it closes at one p.m. A full time Librarian is in charge. During the school session it is open five evenings a week under the supervision of a student assistant Librarian.

There are in the Library about 13,600 bound volumes. The list of books comprises many standard reference works in medicine and surgery and the fundamental sciences, as well as many of the latest text books and monographs. The Library receives more than ninety current journals, in English, French and German, in the fields of chemistry, anatomy, physiology, pharmacology, bacteriology, pathology, medicine, surgery and allied subjects. The files of many of these journals are complete to date. The Library is maintained in part by appropriation from the general fund and in part by the income from the Library Endowment, a gift from the late Doctor William J. Young. The income from this endowment is used only for books and periodicals.

### REQUIREMENTS FOR ADMISSION

The minimum requirement for admission to the School of Medicine is a four-year high school education, or its full equivalent, and three years of work in a college of arts and sciences approved by the Council on Medical Education and Hospitals of the American Medical Association.

The three years of college work shall comprise at least ninety semester hours, exclusive of military and physical education, extending through three years of thirty-two weeks each, exclusive of holidays, in an approved college. Where qualifications are equal preference is given to applicants who have completed four years of college work.

The School of Medicine reserves the right to require more than the minimum hours here set down for admission.

## SUGGESTIONS REGARDING INDIVIDUAL PREMEDICAL SUBJECTS

(a) **CHEMISTRY.** Twelve semester hours required, of which at least eight semester hours must be in general inorganic chemistry, including four semester hours of laboratory work; and four semester hours in organic chemistry, including two semester hours of laboratory work. In the interpretation of this rule, work in qualitative analysis may be counted as general inorganic chemistry. One course in quantitative analysis is also required.

(b) **PHYSICS.** Eight semester hours required, of which at least two must be laboratory work. It is urged that this course be preceded by a course in trigonometry.

(c) **BIOLOGY.** Eight semester hours required, of which four should consist of laboratory work. This requirement may be satisfied by a course of eight semester hours in either general biology or zoology, or by courses of four semester hours each in zoology and botany, but not by botany alone.

(d) **ENGLISH COMPOSITION AND LITERATURE.** The usual introductory college course of six semester hours, or its equivalent, is required.

(e) **NONSCIENCE SUBJECTS.** Of the ninety semester hours required as the measurement of three years of college work, at least eighteen, including the six semester hours of English, should be in subjects other than the physical, chemical or biologic sciences.

(f) **FOREIGN LANGUAGE.** A reading knowledge of a modern foreign language is strongly urged. If the reading knowledge of this language is obtained on the basis of high school work, the student is urged to take another language in his college course. It is not considered advisable, however, to spend more than twelve of the required semester hours on foreign languages.

### SCHEDULE OF SUBJECTS OF THE THREE-YEAR PREMEDICAL COLLEGE COURSE, NINETY SEMESTER HOURS\* REQUIRED.

| Required Subjects:                          | Semester<br>Hours |
|---------------------------------------------|-------------------|
| Chemistry (a) .....                         | 12                |
| Physics (b) .....                           | 8                 |
| Biology (c) .....                           | 8                 |
| English composition and literature (d)..... | 6                 |
| Other nonscience subjects (e) .....         | 12                |

\*A semester hour is the credit value of sixteen weeks work consisting of one lecture or recitation period per week, each period to be not less than fifty minutes net, at least two hours of laboratory work to be considered as the equivalent of one lecture or recitation period.

| Subjects Strongly Urged:                                     | Semester<br>Hours |
|--------------------------------------------------------------|-------------------|
| A modern foreign language (f).....                           | 6-12              |
| Advanced botany or advanced zoology.....                     | 3-6               |
| Psychology and Logic.....                                    | 3-6               |
| Advanced mathematics, including algebra and trigonometry.... | 3-6               |
| Additional courses in chemistry.....                         | 3-6               |

#### Other Suggested Electives:

English (additional), economics, history, sociology, political science, mathematics, Latin, Greek, and drawing.

(g) **IN GENERAL.** This premedical course in both quantity and quality must be such as to make it acceptable as the equivalent of the first three years of the course leading to the degree of Bachelor of Science or Bachelor of Arts in approved colleges of arts and sciences.

### APPLICATIONS FOR ADMISSION

Students desiring admission will be furnished with proper blanks, together with instructions for filling them out. Application forms, when properly filled out, should be returned to the School of Medicine at Augusta. In conformity with the State law, all credentials are acted upon by the State Examiner.

Application for admission should be made early. May 1st is the final date for receiving applications for admission to the first-year class. If there are any vacancies, applications for advanced standing may be considered after May 1st.

The number of students accepted is limited. Preference is given to residents of Georgia. The Committee on Admissions considers the merits of each applicant with the utmost care. The following factors are taken into consideration in selecting from the list of applicants students for admission: scholarship, score on the Medical Aptitude Test of the Association of American Medical Colleges, and rating given by three members of the faculty on personal interview. The applicant is required to take the aptitude test and must report at the college for the personal interviews. At the time of these interviews the applicant is also required to take a physical examination and to pass it satisfactorily to be eligible for admission.

Upon being notified of acceptance, the applicant must deposit twenty-five dollars with the school, as otherwise the place will not be held open to the

exclusion of some other qualified applicant. This deposit will not be returned under any condition but will be credited on fees and deducted from the payment due when the student matriculates.

Women are admitted on the same basis as men.

All communications should be addressed to the University of Georgia School of Medicine, Augusta, Georgia.

### ADMISSION TO ADVANCED STANDING

A student desiring admission to advanced standing is required to present satisfactory evidence that his preliminary and medical education is equivalent to that required of the class to which admission is sought. All high school and college credentials are passed upon in the same manner as those of the applicant for admission to the first year course. Students from accredited medical schools whose record of work is satisfactory may be admitted to advanced standing without examination, though the right of requiring examination is not waived. Students will not be received into any class unless there are vacancies.

With all applications for advanced standing the Committee on Admissions requires a statement from the Dean of the medical school previously attended indicating that the applicant is in good standing and eligible to continue at that school and recommending him for transfer. The Committee considers only those applicants who have clear records and whose comparative standing places them in the middle or upper third of their class. Students are not accepted for admission to the fourth-year class.

### REQUIREMENTS FOR GRADUATION

A candidate for the degree of Doctor of Medicine from the University of Georgia School of Medicine must be of good moral character and at least twenty-one years of age. He must have successfully completed four years of medical study in accredited institutions, the last two years of which shall have been in this school. He must be free from indebtedness to the School of Medicine.

### LICENSING BOARD EXAMINATIONS

The members of the graduating class may take the examination given by the Georgia State Board of Medical Examiners in June shortly after commencement. Examinations in the past have been held in Augusta and this arrangement will in all probability continue. The examination fee is \$20.00.

Under reciprocity agreements, thirty-six other states and the District of Columbia accept licentiates of the Georgia State Board of Medical Examiners.

Parts I and II of the National Board examinations are held under the auspices of the School of Medicine in Augusta. Part III has to be taken elsewhere. Part I covers the work of the first two years and Part II the work of the last two years in the Medical School. Part III consists of a practical examination after the satisfactory completion of an internship of one year.

Fees for the examinations of the National Board are as follows:

|                              |               |
|------------------------------|---------------|
| Registration fee .....       | \$ 5.00       |
| Part I .....                 | 20.00         |
| Part II .....                | 20.00         |
| Part III, Admission fee..... | \$10.00       |
| Final Payment .....          | 30.00 \$40.00 |

The fee for Part III may be borrowed from the National Board of Medical Examiners on a note for one year.

The Certificate of the National Board is recognized by the licensing authorities of forty-three states and four territories. It is also recognized by certain Federal services and by some foreign countries. Diplomates of the National Board are exempted from the scientific examination given by the American College of Surgeons and are admitted to the Mayo Foundation without taking the usual examination.

### ALPHA OMEGA ALPHA

The medical honor fraternity, Alpha Omega Alpha, has established a chapter at the University of Georgia School of Medicine. A selected number from the third and fourth year classes are approved for candidacy by the officers of the school and elections are made by the active members of the chapter.

### SPECIAL STUDENTS

Those desiring to take certain courses only may be registered as special students upon securing the approval of the Dean and making satisfactory arrangements with the heads of the departments in which the work is to be done.

### POST-GRADUATE WORK

Graduates in medicine who desire to do post-graduate work may make the necessary arrangements for it with the Dean and the heads of the departments in which they wish to work. No fees will be charged individuals working in this manner. Fees will be charged only when formal post-graduate courses are offered.

THE UNIVERSITY HOSPITAL, AUGUSTA, GEORGIA

THE WILHENFORD TUBERCULOSIS HOSPITAL

## FELLOWSHIPS

Research fellowships are offered, with a stipend of \$900.00 per annum. These fellowships vary in the departments from year to year. Candidates for these fellowships are required to have the degree of doctor of medicine, doctor of philosophy, or doctor of science.

## EXAMINATION AND PROMOTION

In order to be eligible for credit in major courses (those of one hundred hours or more) the student must attend a minimum of eighty per cent of the class exercises of each course. Time lost by absences for any reason in major or minor courses must be made up to the satisfaction of the instructor in charge of the course.

Final examinations are held at the conclusion of the various courses. These examinations may come at the end of the first, second or third trimester, or at any time within a trimester that a course may be completed. The passing mark is 75 per cent. A student making below 75 and above 70 is conditioned in the course in question and may be given a re-examination in the subject if a similar failure is not made in more than one other subject. Students who make below 75 in three different courses, within one year, will be required to repeat the year's work or withdraw from the school. Whenever a student makes a grade of less than 70, the course must be repeated with credit before promotion to the next year or before graduation. Students who are required to withdraw from school on account of scholastic failures will not be re-admitted. No student will be allowed to repeat more than one year during the medical course on account of scholastic failures.

At the end of each school year there will be a meeting of the Promotion Boards to pass on the promotion of each individual student. Recommendations for degrees are made by the faculty as a whole.

Any student who by reason of a lack of sobriety, honesty or moral character manifests a distinct unfitness for the practice of medicine, will be required to withdraw from the school. Cheating in any form at any time will be punished with a minimum of suspension from school for the remainder of the scholastic year, with failure in the course in question.

## REGISTRATION

Each student before beginning any class work is required to register at the office. All credentials pertaining to entrance requirements must have been approved. Students will not be permitted to register later than two weeks after the opening of the session. First year students are required to register on the first day of the registration period. Any student accepted

for admission to the first-year class who fails to report on the date set for first-year registration forfeits his place in the class.

**Penalty Fee:** A penalty fee of \$5.00 is charged students who register later than the regular registration day for the first trimester, or pay fees later than dates due at the beginning of the second and third trimesters.

### TUITION AND FEES

In conformity with the regulations governing other branches of the University of Georgia, the School of Medicine does not require tuition fees of residents of the state.

Beginning with the session 1940-41 the laboratory fees for residents of Georgia have been increased from \$185.00 to \$225.00 per year, payable in three installments of \$75.00 each, at the beginning of each trimester.

The fees for non-residents are \$145.00 each year. This sum includes tuition and laboratory fees.

A breakage deposit is required of each student to cover possible injury to the property of the University. The unused portion of this deposit is returned at the end of the college year. The breakage deposit for first-year students is \$15.00; for second, third and fourth-year students, \$10.00.

Payment of a health and students' activities fee of \$5.00 is also required of each student.

Wives and children of medical students, who are living with the student, may be included in the students' hospitalization plan upon payment of a fee of \$2.50 for each such dependent. This fee is optional and is payable upon registration for the fall trimester.

Upon graduation, each student is charged a diploma fee of \$5.00.

All fees and other charges are subject to change at the end of each quarter or semester.

### REFUND OF FEES

No refund of laboratory fees is made except on account of serious illness. A student withdrawing within four weeks of the opening of the first trimester, who secures from the Dean a statement of honorable standing and from a physician a certificate of inability to remain in attendance, is allowed a refund of one half of the first payment due on fees at the time of registration, and all of any amount paid on the second or third payments on fees. No refund is allowed a student who withdraws later than four weeks after the beginning of the first trimester.

### STUDENTS' AID

**CHARLES McDONALD BROWN SCHOLARSHIP FUND.** This endowment was established in 1883, by the Hon. Joseph E. Brown, ex-Governor of Georgia, in memory of his son, Charles McDonald Brown, of the Class of 1878, for the purpose of aiding young men in defraying the expenses of their education. The interest on this fund is lent to worthy young men on condition that they obligate themselves to return it with four per cent interest.

By the rules and regulations for the administration of this fund, any student in the School of Medicine is eligible to participate in its benefit. A special circular of information concerning the fund and blank forms of application will be supplied on request. Applications for loans from this fund must be made on these forms and must be in the office of the Registrar of the School of Medicine not later than June 1. Only \$150.00 a year is allowed a borrowing student.

The Students Loan Fund, founded in 1926 by Dr. James Russell Howell of the class of that year, was begun for the purpose of assisting "deserving students in equipping themselves for the medical profession." Contributions to the fund consist of the unused portions of breakage fees deposited by members of the fourth year class, these unused portions being left by each graduating class as a memorial. The names of the students and the amount donated in this manner by each member of the class are duly placed on permanent record.

The income from the Eugene E. Murphey Fund, donated by Mr. Byron B. Taggart in honor of Dr. Murphey, is loaned to deserving students at a moderate rate of interest.

### STUDENT EXPENSES

In addition to the fees payable to the college, from \$50.00 to \$100.00 a year is required to cover the cost of textbooks and instruments used by the student.

Suitable board and room may be obtained in the vicinity of the college for \$8.00 to \$10.00 a week.

Each student is required to have a suitable microscope of his own. Purchase of a microscope may be arranged through the office and payment may be made in four yearly installments. The student is permitted to make this choice from several standard microscopes or to bring a microscope with him.

There are no extra fees with the exception of the diploma fee.

## GENERAL PLAN OF INSTRUCTION

The regular course extends through four years of thirty-three weeks net, from the latter part of September to the first part of June. Each year is divided into three trimesters of eleven weeks each, exclusive of holidays.

The work of the first two years is devoted principally to a study of the fundamental sciences of chemistry, anatomy, physiology, pharmacology, pathology and bacteriology. The instruction is largely practical and most of the time is spent by the student in the laboratory, working under supervision. The laboratory work is supplemented by lectures, quizzes and conferences, which are designed to explain the fundamental principles of the subjects studied and to emphasize their relation to the study of medicine.

In the second trimester of the second year clinical work is introduced by the courses in physical diagnosis, clinical pathology and surgery.

During the third year, besides attending lectures and demonstrations, the student spends a considerable part of his time in the medical and surgical clinics. Here, under supervision of the attending staff, he examines patients, prepares case records, makes diagnoses and outlines the indicated treatments.

In the fourth year, instruction is given almost wholly in the wards of the hospital, in the out-patient department, and in the course in domiciliary medicine in the patients' home.

A detailed description of the work in the various years is given under the separate departmental announcements.

## DEPARTMENTS

## GROSS ANATOMY

DR. G. LOMBARD KELLY, *Professor*

\*DR. FRED A. METTLER, *Professor*

DR. LANE H. ALLEN, *Associate Professor*

DR. W. F. ALEXANDER, *Assistant Professor*

DR. E. M. BRADLEY, *Assistant Professor*

The facilities of the department include two well-lighted dissecting rooms, with supply-room and embalming and storage-room for cadavers, a preparation room, lecture-room with projection apparatus, a museum of anatomical specimens, models and charts, an animal house with ample supply of laboratory animals, an operating room with complete equipment for aseptic work, photographic and charting rooms and offices for the staff.

The required courses given by the department are designed (1) to enable the student to secure a comprehensive knowledge of the anatomy of the human body; (2) to develop in the student independence and initiative and the ability to make firsthand observations and records. The courses in gross, topographical and clinical anatomy are correlated with the work given in microscopic anatomy, surgery and medicine wherever practicable. Elective courses are offered for students who desire to extend their knowledge of anatomy beyond that obtained in the required courses, and for those wishing to undertake investigation of anatomical problems.

101. GROSS ANATOMY. The basis of this course consists of the dissection, by each student, of a lateral half of the human body. This work is done under close personal supervision of the teaching staff and oral examinations are held at stated intervals. The use of the accessory techniques provided in the museum is encouraged. Radiographic studies of the normal are available to the student. Each student is supplied with a set of bones for the study of osteology. In this latter course didactic hours are correlated with the dissection of the body. Each student is required to draw all of the bones in the body. For study of the individual bones of the skull, the students in groups use disarticulated skulls. First year, first trimester, 22 hours a week; second trimester, 20 hours a week, 462 hours. *Professors Kelly, Allen, Alexander and Bradley.*

101A. CLINICAL ANATOMY. A new course to stimulate the interest of the student in gross anatomy. The demonstrations and lectures are given by clinical professors in the various specialties. The class sees lumbar and cisternal punctures, paracentesis thoracis and abdominis and like procedures and attends clinics on cases that are correlated with gross anatomy.

\*On leave of absence, 1941-42.

First year, first 7 weeks of first trimester, 1 hour a week, 7 hours. *Members of the Clinical Staffs.*

104. **NEURO-ANATOMY.** This course consists of the study of the gross and microscopic anatomy of the central and autonomic nervous systems. The cellular and fibrous arrangements are considered in a complete Nissl and Weigert series, each student having a set of slides taken at intervals of 200 micra. Special stains and degeneration preparations are also utilized. The angiology and embryology of the brain and cord are included. First year, third trimester, 9 hours a week, lectures, 22 hours, laboratory, 77 hours. *Professor Alexander and staff.*

201. **TOPOGRAPHICAL AND CROSS-SECTION ANATOMY.** The first half of this course is designed to lay the foundation for the application of the principles of physical diagnosis. The student learns, by lecture and laboratory work, to project upon the surface of the body the various underlying structures. In the second half of the course anatomical relations are taught by means of cross sections. The lecture series reviews the entire field of gross anatomy and emphasizes topics of special clinical importance. Second year, third trimester. 8 hours a week, didactic, 44 hours; laboratory, 44 hours. *Professors Kelly, Allen and Bradley.*

301. **ADVANCED ANATOMY AND INVESTIGATION.** To qualified students and graduates informal advanced courses in the different branches of anatomy are offered. During the third trimester opportunity for informal dissection of the infant as well as the adult is offered to interested workers. Registration and the payment of a laboratory fee ten days before the third trimester is required. Enrollment is limited.

Encouragement and opportunity are also given to students and others who have sufficient preparation to undertake the investigation of original problems in anatomy. A reading knowledge of French and German is essential. *Professors Kelly, Allen Alexander and Bradley.*

## MICROSCOPIC ANATOMY

DR. JOSEPH KRAFKA, *Professor*

DR. LESTER L. BOWLES, *Assistant Professor*

DR. CHARLES R. NOBACK, *Assistant Professor*

DR. G. GORDON ROBERTSON, *Research Fellow*

The facilities of the department include a well-lighted laboratory for microscopic anatomy, an adjacent preparation room fully equipped with microtomes, ovens, etc., a lecture room with projection apparatus, a dark room for photomicrography, offices and laboratories for the staff. An anatomical museum, animal house and operating room are shared in common with the department of anatomy. An extensive series of histological and embryological preparations are available as individual loan sets to the students.

The required courses offered by this department are designed to enable the student to secure a comprehensive knowledge of the cellular structure of the body, of its mode of development and the factors responsible for its growth and differentiation. The work is correlated, as far as practical, with the courses in gross anatomy, physiology and pathology. In addition to the didactic and laboratory work, a special course is required in methods of securing information from the current literature.

102. HISTOLOGY. A study of the elementary tissues is followed by that of the organs. The special sense organs are included. Lectures, textbook assignments and frequent examinations constitute the didactic part of the work, while individual study and drawing of prepared slides comprise the laboratory assignments. Fresh tissues are frequently used. First year, first trimester, 14 hours a week, lectures 55 hours, laboratory 99 hours. *Professors Krafka, Bowles and Noback.*

103. EMBRYOLOGY. This course covers maturation, fertilization, cleavage, formation of the germ layers, development of the external body form, histogenesis and organogenesis. Use is made of living and injected chick embryos, of pig embryos for dissection, and of serial sections of chick, rat, pig and human embryos. Demonstrations are also made in methods of transplantation. First year, second trimester, 9 hours a week, lectures, 33 hours, laboratory, 66 hours. *Professors Krafka, Bowles, Noback and Robertson.*

105. BIBLIOGRAPHY. This course is intended to acquaint the student with the methods of referring to the scientific and medical literature. As practice in the work, a subject is assigned to each student on which he is to write a paper with a complete and accurate bibliography. First year, first trimester, 1 hour a week, 11 hours. *Professor Krafka.*

302. ADVANCED ANATOMY AND INVESTIGATION. To qualified students and graduates, informal advanced courses in the various branches of microscopical anatomy are offered. Encouragement and opportunity is also given to students interested in the development of historical medicine, with special reference to that of Georgia. *Professor Krafka.*

## CHEMISTRY

DR. CARLTON H. MARYOTT, *Professor*

DR. ALFRED P. BRIGGS, *Associate Professor*

DR. WILLIAM R. BROWN, *Assistant Professor*

DR. SAM A. SINGAL, *Assistant Professor*

Courses in general inorganic chemistry, qualitative analysis, quantitative analysis, and organic chemistry are prerequisites for this work.

101. **PHYSIOLOGICAL CHEMISTRY.** The first part of this course is given to a review of those principles of physical chemistry that are of greatest importance from the standpoint of the medical student. This is followed by a study of the chemical composition and reactions of the carbohydrates, lipins, proteins, and other substances of biological interest. The various tissues and fluids of the body are studied, and considerable quantitative work is done on food, gastric juice, blood and urine. Nutrition and metabolism receive particular attention, and metabolism experiments are conducted by members of the class. Frequent references are made to current literature. First year, second trimester, 9 hours a week; third trimester, 15 hours a week, 264 hours. *Professors Maryott, Briggs, Brown and Singal.*

301. **CLINICAL BIOCHEMISTRY.** Normal metabolic processes will be reviewed. Disturbances to the normal metabolism will be pointed out. Patients presenting metabolic disturbances will be demonstrated and discussed. Third year, second trimester, 2 hours a week, 22 hours. *Professor Briggs.*

A laboratory course in advanced Physiological Chemistry is offered by the staff to students, who, having had course 101 or its equivalent, wish to continue further the study of biochemical methods. Among the methods studied are those for determining the hydrogen ion concentration of body fluids, the determination of blood calcium, magnesium, cholesterol, and the blood gases. Hours to be arranged.

In addition to the above courses, opportunity is given to qualified students to enter upon the investigation of new problems.

## PHYSIOLOGY AND PHARMACOLOGY

DR. W. F. HAMILTON, *Professor*DR. R. A. WOODBURY, *Professor*DR. PHILIP DOW, *Associate Professor*DR. BENEDICT E. ABREU, *Assistant Professor*DR. ROBERT H. SHULER, *Assistant Professor*

101-201. **PHYSIOLOGY.** In the lectures of this course the object is to acquaint the student with the more fundamental concepts of physiology and to consider in detail those portions of the subject that are essential to an understanding of the phenomena of health and disease in man.

The laboratory exercises are planned to discipline the student in the method of experimentation as applied to the acquisition of physiological knowledge, and to give him first-hand experience with the principal types of experiment employed in the analysis of function. The work on cold blooded animals is held to the minimum necessary to establish elementary experimental technique. The more detailed experiments are performed on mammals and on the students themselves. It is the opinion of the department staff that fundamental scientific problems can best be emphasized in laboratory problems which are of obvious interest directly in terms of the students' ambition to become practical physicians.

Conferences and demonstrations supplement the more formal instruction.

First year, third trimester, 8 hours; second year, first trimester, 12 hours a week, 220 hours. *The Staff.*

In 1941-42 Physiology 201 will be taught the first and second trimesters.

202. **PHARMACOLOGY AND MATERIA MEDICA.** Class room instruction in pharmacology has as one of its objectives the extending and reinforcing of the knowledge of function laid down in the previous course of physiology. The second objective is to encourage the student to make these physiological principles the basis upon which to assemble carefully selected pharmacological data of such nature as to enable him to practice rational therapeutics later as a physician. Instruction in the purely physical or chemical properties of drugs is only to the extent of their direct bearing on pharmacology.

The department is in accord with the trend towards the limitation of drug therapy to observable beneficial effects. To this end the scope of drugs studied by the student is sharply curtailed. This affords an opportunity of acquiring that working knowledge of the modes of action of drugs so essential to their proper use. As a result, closer correlation is possible between this department and clinical instruction in the use of drugs, whether for diagnosis, prevention, or cure of diseases. The closer the

---

correlation between these departments, the better is the student prepared to utilize drugs in practice. Each student acts as observer in the drug room for a limited time.

Experiments and demonstrations are carefully chosen as the basis of class room instruction. The scope of the laboratory exercises covers certain chemical and physical properties of drugs, and the important local and systemic effects of these drugs on the central nervous system, senses, respiratory tract, heart, circulation, digestive and genito-urinary tracts and skin. This laboratory work should encourage insistence upon controlled therapeutic results later when the student is engaged in clinical work as a physician.

Second year, second trimester, 18 hours a week, third trimester 1 hour a week, 209 hours. *The Staff.*

## PATHOLOGY

DR. EDGAR R. PUND, *Professor*DR. STEWART H. AUERBACH, *Assistant Professor*

201. GENERAL PATHOLOGY, MORBID ANATOMY AND HISTOLOGY. This is a course in the fundamental principles and processes of general pathology; the regressive changes, the progressive changes, including tumors, and inflammation. Because the study of pathology differs considerably from that of the other preclinical subjects, an attempt is made to conduct the course as an introduction into the clinical branches.

At the daily exercises a process is first explained and then illustrated by gross demonstration of selected specimens and by projection demonstration of microscopic slides. The specimens are then distributed for study. The student studies the specimen; then makes a drawing in the note-book; and also permanent notes descriptive of the process as a whole.

The student is taught to regard the structural changes not as the whole of pathology, but rather as examples and illustrations of the effects of morbid processes. Functional changes are explained in lectures and are stressed in the recitations.

The museum is well supplied with selected and attractively preserved specimens. The microscopic slides are loaned from a collection. The course in General Pathology is continuous with the course in Special Pathology.

202. SPECIAL PATHOLOGY. A course in the disease of the systems, including Gynecological Pathology and Neuropathology.

The plan of the work is the same as in the course in General Pathology to which indeed this course is directly complementary. In addition, attention is given to surgical pathological diagnosis. Fresh surgical specimens are demonstrated to small groups, and the gross study is followed by individual microscopic study of selected specimens. The student is required to submit a written report describing in detail the morbid changes. The report is criticized by the instructor in conference with the student.

Second year, first trimester, 18 hours a week, 198 hours; second trimester, 9 hours a week, 99 hours. Total hours 297. *Professors Pund and Auerbach.*

203. NECROPSIES. The necropsies are done in a specially equipped amphitheater, which is conveniently located in the building of the Department of Pathology. The second-year class is required, and the third and fourth-year classes encouraged to attend. *The Staff.*

clinical departments, conferences are held upon the cases which come to

401. CLINICAL PATHOLOGICAL CONFERENCE. In cooperation with the

---

necropsy. That member of the fourth year class to whom the case had been assigned in the hospital presents the clinical history. The case is discussed first by a selected student of the fourth year class and then by the head of the clinical department. The pathologist presents the findings of the necropsy and attempts to correlate his observations with the clinical course. Fourth year, 1 hour a week, 33 hours. *The Staff*.

Encouragement and opportunity are offered to qualified students to follow advanced work and to a few graduates to learn the common methods of investigation employed in research in pathology.

## BACTERIOLOGY AND PUBLIC HEALTH

DR. EVERETT S. SANDERSON, *Professor*

DR. ROBERT B. DIENST, *Associate Professor*

DR. EUGENE E. MURPHEY, *Lecturer in Preventive Medicine*

DR. T. B. PHINIZY, *Commissioner of Health, Richmond County Health Department, Lecturer in School Hygiene*

DR. P. A. MULHERIN, *Lecturer in School Hygiene*

DR. ARCHIE L. HAGGERTY, *Chief, Milk and Food Division, Richmond County Health Department, Lecturer in Milk and Meat Inspection.*

101. PUBLIC HEALTH. An introductory course to Public Health. In addition to lectures, students will be assigned topics of a public health nature upon which they will be required to write a term paper. First year, first trimester, 1 hour a week, 11 hours. *Dr. Sanderson.*

201. BACTERIOLOGY AND IMMUNOLOGY. The course is designed to familiarize students with the principles of general bacteriology and parasitology, but with special emphasis on those organisms producing disease conditions in man, together with the application of measures for their control, and a discussion of the mechanism of infection and resistance. The disease producing properties of the commoner pathogenic bacteria and protozoa, with methods for their cultivation, isolation and identification will be studied in the laboratory. The principal serologic methods of diagnosis will also be carried out. Second year, first trimester, 18 hours a week, 198 hours. *Drs. Sanderson and Dienst.*

301. PUBLIC HEALTH. Field trips. The course is designed to familiarize students with modern health measures as exemplified in water purification, sewage disposal, mosquito control, dairy farm and milk plant sanitation, meat canneries and meat inspection, school hygiene, industrial hygiene, rural sanitation, diagnostic laboratory procedures, city, county, state, and federal health department organization, etc. In so far as possible, these trips will be supplemented by lectures devoted to health problems as related to the State of Georgia and presented by members of the staff of the Georgia State Department of Health. Third year, first trimester, 4 hours a week, 44 hours. *Drs. Sanderson, Dienst and Haggerty.*

302. PUBLIC HEALTH. A series of lectures devoted to the historical development of public health and preventive medicine. Third year, third trimester, 2 hours a week, 22 hours. *Dr. Murphey.*

303. PUBLIC HEALTH. Epidemiology. A series of lectures devoted to the theory of statistics, statistical methods, and the application of statistics to the field of public health. Lectures and reading assignments are employed to illustrate the epidemiological approach in the study and

control of communicable diseases. Third year, third trimester, 1 hour a week, 11 hours. *Dr. Sanderson.*

401. PUBLIC HEALTH. School Hygiene. Students in small groups will be assigned to the public schools of Richmond County. Instruction will be devoted to the detection of physical defects of school children, the interpretation of Schick and tuberculin tests, and the procedures employed in prophylactic immunization. Fourth year,  $\frac{1}{3}$  of class, repeated each trimester, 2 hours a week, 22 hours. *Drs. Phinizy and Mulherin.*

402. PUBLIC HEALTH. Health Surveys. Elective. The opportunity to make a health survey will be given to those who desire to do so. Communities not larger than 10,000 to 20,000 population are to be preferred. A properly completed survey will give to the student an idea of actual community health conditions, deficiencies, health organization set-up, difficulties encountered in health administration, etc., as can be obtained in no other way. Offered to students in the third and fourth year. Hours to be arranged. *Drs. Sanderson and Dienst.*

The Department of Bacteriology and Public Health is equipped for research and offers to properly qualified undergraduate and graduate students opportunities to undertake original investigative work. Physicians and dentists who may be interested in some special problem may apply for space and materials.

DR. S. A. SINGAL, *Research Fellow*

Instruction in physical diagnosis and clinical pathology is begun in the second trimester of the second year; both subjects are taught largely by demonstration and practical exercises. Throughout the third year advanced work in physical diagnosis is given using selected cases from the abundant material of the out-patient department. During this year a comprehensive survey of medicine is given by means of a recitation course based on a standard text. Therapeutics is emphasized. In the fourth year two hours a week are devoted to clinical lectures and demonstrations, the great bulk of instruction being carried on at the bedside.

201. PHYSICAL DIAGNOSIS. Recitations, demonstrations and practical exercises, emphasis is laid on normal physical signs. Second year, second trimester, 2 hours a week, third trimester, 7 hours a week, 99 hours. *Dr. Sydenstricker and Staff.*

*\*On active duty with U. S. Army.*

202. CLINICAL PATHOLOGY. Lectures and practical exercises covering the field in this subject. Standard methods are taught. Beginning with examination of the urine and blood, the course is continued to include all the usual laboratory procedures, blood chemical determinations and clinical bacteriology. The hospital furnishes an abundant supply of material. The student carries out all the procedures. Second year, second trimester, 6 hours a week, third trimester, 9 hours a week, 165 hours. *Dr. Mealing and Assistants.*

301. MEDICINE. A large part of general medicine is covered in this course in recitations based on a standard text. Diseases that are frequently seen in the clinics are not emphasized here. Third year, 2 hours a week, 66 hours. *Drs. Thomas and DeV Vaughn.*

301-a. ENDOCRINOLOGY. This course presents in detail the most important endocrine disturbances and methods of treatment. Third year, 1 hour a week, 33 hours. *Dr. Lee.*

302. CLINICAL MEDICINE. Practical instruction is given to small groups in the out-patient department, covering history taking, physical examination, diagnosis and treatment. The student is assigned a newly admitted patient, required to take a complete history and after examining the patient suggest therapy. All phases of this work are supervised. The follow-up of return cases is an important part of this work. Approximately 4,500 patients are admitted to the medical division of the out-patient department each year. Third year,  $\frac{1}{2}$  of class, 8 hours a week, 88 hours. Repeated each trimester. *Drs. Sydenstricker, Briggs, Davidson, Mealing, Gray, Phinizy, Harper, Butler and DeV Vaughn.*

303. THERAPEUTICS AND MATERIA MEDICA. A general course covering the necessary instruction in these subjects. Third year, first trimester, 5 hours a week; second trimester, 2 hours a week, 77 hours. *Drs. Davidson and Walden.*

304. WARD ROUNDS. Ward rounds for the third year class are conducted three times a week. Third year,  $\frac{1}{2}$  of class, 8 hours a week, 33 hours. Repeated each trimester. *Drs. Butler, Brittingham and Mealing.*

401. APPLIED THERAPEUTICS. This course presents in detail the most important methods of treatment. Fourth year, first and second trimesters, 1 hour a week, 22 hours. *Dr. Lee.*

402. MEDICAL CLINICS. Fourth year, 2 hours a week, 66 hours. *Drs. Murphy, Sydenstricker and Brittingham.*

403. MEDICAL JURISPRUDENCE. A lecture course on the more important phases of this subject. Fourth year, third trimester, 1 hour a week, 11 hours. *Mr. McClure.*

404. **WARD ROUNDS AND WARD WORK.** For a period of eleven weeks one-third of the fourth-year class is assigned to the medical wards as clinical clerks. Each patient entering the wards is assigned to a student who records the history and physical findings and carries out the routine laboratory procedures. The students are required to attend ward rounds with visiting physicians daily and make notes on the patients' progress and on the therapeutic measures employed. Fourth year,  $\frac{1}{3}$  of class, 5 hours a week, 55 hours. Repeated each trimester. *Drs. Sydenstricker, Cranston, Butler, Phinizy and Gray.*

405. **DOMICILIARY MEDICINE.** Under the supervision of members of the Staff fourth-year students attend the sick poor in their homes in one district of the city. History, physical examination and laboratory examinations are made and recorded and daily visits paid, each case being followed to its completion. There are daily conferences where the instructor meets the group of students and a history meeting is held once a week. One-third of the fourth-year class is assigned to this work for one trimester. *Drs. Lee and Resident Staff.*

406. **SYPHILIS CLINIC.** Fourth year,  $\frac{1}{3}$  of class, 4 hours a week, 44 hours. Repeated each trimester. *Dr. Brittingham and Resident Staff.*

407. **DIABETES CLINIC.** Fourth year,  $\frac{1}{3}$  of class, 1 hour a week, 11 hours. Repeated each trimester. *Drs. Briggs and Gray.*

408. **CARDIAC CLINIC.** Fourth year,  $\frac{1}{3}$  of class, 1 hour a week, 11 hours. Repeated each trimester. *Drs. Cranston, Brittingham, Briggs and Harper.*

409. **CLINICAL PATHOLOGICAL CONFERENCE.** Clinical and autopsy findings are compared and correlated. The histories and material are from the hospital. For scheduled hours see **PATHOLOGY 401.**

410. **MEDICAL SEMINAR.** Elective. Electrocardiography. Fourth year, first trimester, 1 hour a week, 11 hours. *Drs. Brittingham and Harper.*

411. **MEDICAL SEMINAR.** Elective. Fourth year, second trimester, 2 hours a week, 22 hours. *Dr. Sydenstricker.*

## NEUROPSYCHIATRY

DR. H. M. CLECKLEY, *Professor.*

DR. W. J. CRANSTON, *Clinical Professor.*

101. **PSYCHOBIOLOGY.** A recitation and lecture course in which the common psychopathological processes which underlie mental disorder are considered with especial reference to the personality as a whole. An effort is made to keep in view the general principles of normal psychobiological functioning and their close relation to morbid personality reactions. Each student is required to make a detailed and complete personality study of his own personality in the form of a written report. First year, 1 hour a week, 26 hours. *Dr. Cleckley.*

301. **NEUROLOGY.** A recitation and lecture course on organic diseases of the nervous system. Third year, 2 hours a week, 66 hours. See also Neurologic Surgery 301. *Dr. Cleckley.*

302. **CLINICAL NEUROPSYCHIATRY.** Practical instruction given to small groups in the out-patient department. History taking, neurological examination and psychiatric methods. Third year,  $\frac{1}{2}$  of class, 2 hours a week, 22 hours. Repeated each trimester. *Dr. Cleckley and Resident Staff.*

401. **NEUROLOGY.** A lecture and demonstration course in disorders of the nervous system. Fourth year, 1 hour a week, 33 hours. *Dr. Cleckley.*

402. **PSYCHIATRY.** A lecture and recitation course outlining the more important mental diseases and the psychoneuroses, with clinical demonstrations and lectures by visiting psychiatrists. The class spends two days at the Georgia State Hospital for the Insane, at Milledgeville, studying cases and attending clinics under the direction of the staff. Fourth year, 1 hour a week, 33 hours. *Dr. Cleckley.*

403. **PSYCHIATRIC CLINICS.** Demonstrations and lectures presenting the more important psychoses. Fourth year, 18 hours. *Dr. Cleckley and Visiting Staff.*

## TUBERCULOSIS

DR. L. N. TODD, *Professor*DR. T. B. PHINIZY, *Clinical Assistant*

Specialized instruction in tuberculosis begins in the third trimester of the third year with a lecture course on the fundamentals of the disease. In the fourth year the work is entirely clinical. The facilities of a new tuberculosis hospital unit of sixty beds will be available after January, 1942, for teaching purposes, in addition to an active out-patient diagnostic and pneumothorax clinic. Modern methods of diagnosis and treatment, including surgical collapse, are stressed.

301. TUBERCULOSIS LECTURES. Third year, entire class, 1 hour a week, 11 hours, third trimester. *Dr. Todd.*

401. TUBERCULOSIS CLINIC. Fourth year,  $\frac{1}{3}$  of class, 3 hours a week, 33 hours. Repeated each trimester. *Drs. Todd, Phinizy and Assistant Resident.*

402. SURGICAL TUBERCULOSIS CONFERENCE. Fourth year,  $\frac{1}{3}$  of class, 1 hour a week, 11 hours. Repeated each trimester. *Drs. Todd and Sherman.*

## HISTORY OF MEDICINE

\*DR. CECILIA C. METTLER, *Assistant Professor*

The required courses given by the department are designed to correlate the history of medicine with the subjects included in the respective scholastic years. An elective course is offered for students who are desirous of extending their knowledge of medical historiography or who wish to undertake special investigation in the field.

101. HISTORY OF MEDICINE. This course consists of lectures on the history of anatomy, embryology, histology, neuroanatomy, physiology and chemistry. First year, third trimester, one hour a week, 11 hours, didactic.

201. HISTORY OF MEDICINE. A lecture course on the history of pharmacology, bacteriology, pathology, physical diagnosis and surgery. Second year, second trimester, one hour a week, 11 hours didactic.

301. MEDICAL HISTORIOGRAPHY. A course to stimulate the interest of the student in the history of medicine and acquaint him with the methods of library reference. A review of the methods of medical historical research and the preparation of manuscripts is offered. Encouragement and opportunity are given to students desirous of undertaking a special problem. Hours to be arranged.

\*On leave of absence 1941-42.

## PEDIATRICS

DR. CLAUDE M. BURPEE, *Professor*

DR. ROBERT C. MCGAHEE, *Assistant Clinical Professor*

DR. PHILIP A. MULHERIN, *Assistant Clinical Professor*

DR. HENRY P. HARRELL, *Clinical Associate*

DR. F. X. MULHERIN, *Clinical Associate*

DR. I. E. FLETCHER, *Clinical Assistant*

DR. CLAUDE E. TESSIER, *Clinical Assistant*

A thorough understanding of what constitutes the normal baby and child is an essential, upon which the proper teaching of pediatrics should be based. Accordingly, instruction pertaining to the normal baby and child is stressed.

Preventive pediatrics is taught to students as the ideal in the successful practice of pediatrics. With every ill child demonstrated in clinics, not only the pathological and clinical manifestations are considered, but also the preventive aspects of the case are emphasized.

Realizing that only by actual contact and proper study of sick children can the important diagnostic and therapeutic differences peculiar to this branch of medicine be mastered, the instruction throughout the fourth year is essentially practical.

301. During the first trimester in the third year the class is instructed on the development of the normal infant and child and physical diagnosis as applied to infants and children. Half of the time is spent in lectures and quizzes and the rest in actual examination of patients on the pediatric ward. Third year, first trimester, 2 hours a week, 22 hours. *Dr. Burpee and Staff.*

302. During the second trimester in the third year the class is instructed in infant feeding, nutritional disturbances and hygiene in infancy and childhood, and the more important diseases of infancy and childhood. Third year, second trimester, 2 hours a week, 22 hours. *Dr. Burpee.*

303. During the third trimester in the third year the study of the more important diseases of infancy and childhood, including the communicable diseases is continued. Third year, third trimester, 3 hours a week, 33 hours. *Dr. Burpee.*

304. **WARD ROUNDS.** The third year class is divided into three groups, each of which attends ward rounds twice weekly, for eleven weeks. Third year,  $\frac{1}{3}$  of class, 2 hours a week, 22 hours. Repeated each trimester. *Drs. Harrell and Tessier.*

401. **PREVENTIVE PEDIATRICS.** As a result of thorough organization and commendable cooperation between the Public Health Department, the Obstetrical Department, and the Pediatric Department, preventive pediatrics receives its proper consideration. The Public Health Department with its excellent corps of district nurses, social workers, and the follow-up system,

keeps the well-baby clinic abundantly supplied with excellent teaching material. The Obstetrical Department turns over to the Pediatric Department all babies born in the hospital as soon as the cord is tied. Also in its out-patient obstetrical service the babies are referred to the well-baby clinic as soon as it is practical.

By such cooperation between the different departments, the students are able to give prenatal advice, deliver the mother, attend the newly born, and later care for the baby during infancy in the well-baby clinic.

In this way the essentials of preventive pediatrics, such as maternal feeding, mixed feeding, artificial feeding, hygiene, immunization against diphtheria, typhoid and small-pox, are taught in a practical manner. Fourth-year students, in small groups, are required to attend. Fourth year,  $\frac{1}{2}$  of class, 1 hour a week, 11 hours. Repeated each trimester. *Dr. Burpee.*

402. OUT-PATIENT DEPARTMENT. The students of the fourth-year class in small sections, are required to work daily for a period of six weeks in the pediatric out-patient department for sick babies and children. The yearly attendance of patients in this department is well over two thousand. The students are taught to take histories, diagnose and treat the cases under the supervision of members of the pediatric staff. All varieties of children's diseases are seen and treated in this department. Cases of special interest are sent to the hospital, and are used as clinical material before the entire class. Fourth year,  $\frac{1}{6}$  of class,  $\frac{1}{2}$  of trimester,  $7\frac{1}{2}$  hours a week, 41 hours. Repeated each trimester. *Drs. Burpee, McGahee, P. A. Mulherin, Tessier, and Fletcher.*

403. WARD WORK. During the fourth year the various acute and chronic diseases of infancy and childhood are taught in the pediatric wards of the University Hospital. Cases are assigned to students to be worked up, and these cases are used later in clinics given before the entire class. Material is quite sufficient to demonstrate practically all of the diseases of infancy and childhood. No didactic lectures are given; all the work is clinical throughout the fourth year. The student sees practically all pediatric cases going through the University Hospital. This gives the student opportunity to study diseases in the patient as well as in the textbook. Fourth year,  $\frac{1}{2}$  of class for 11 weeks. *Dr. Burpee and Hospital Staff.*

404. PEDIATRIC CLINICS. Fourth Year, 2 hours a week, 66 hours. *Drs. Burpee and McGahee.*

405. PEDIATRIC PSYCHIATRY. Behavior abnormalities in children. Fourth year, third trimester, 1 hour a week, 11 hours. *Dr. P. A. Mulherin.*

406. CLINICAL PATHOLOGICAL CONFERENCE. This is held in conjunction with the departments of Medicine, Pathology, and Surgery. For scheduled hours see PATHOLOGY 401.

## SURGERY

DR. J. H. SHERMAN, *Professor*  
DR. W. W. BATTEY, *Clinical Professor*  
DR. R. H. CHANEY, *Clinical Professor*  
DR. R. L. RHODES, *Clinical Professor*  
DR. C. G. HENRY, *Associate Professor*  
DR. C. D. WARD, *Assistant Clinical Professor*  
\*DR. R. B. WEEKS, *Assistant Clinical Professor*  
DR. C. R. BATTEY, *Clinical Assistant*  
DR. J. B. BOWEN, *Clinical Assistant*  
DR. J. P. HITCHCOCK, *Clinical Assistant*  
DR. J. E. HUMMEL, *Clinical Assistant*  
DR. G. F. JONES, JR., *Clinical Assistant*  
DR. W. J. WILLIAMS, *Clinical Assistant*  
DR. M. H. WYLIE, *Clinical Assistant*

Instruction in surgery is begun in the last trimester of the second year when an attempt is made to correlate the students' preclinical knowledge with the fundamentals of surgery. In the third year a balance is struck between didactic teaching and practical instruction in the out-patient department, hospital and laboratory. In the fourth year didactic teaching is minimized and emphasis placed on the intimate contact between student and patient, using the clinical material in the hospital and out-patient department.

The courses in the sub-departments of surgery are listed separately.

201. **INTRODUCTION TO SURGERY.** The purpose of this course is to serve as a bridge between the knowledge gained in the preclinical courses and the application of the knowledge to the diagnosis and treatment of surgical conditions. This is accomplished by a series of lectures, demonstrations and recitations. The student is also given instruction in the bedside examination of surgical patients. Second year, third trimester, 2 hours a week, 22 hours. *Dr. Henry.*

301. **PRINCIPLES OF SURGERY.** A lecture and recitation course in which, based on a standard text, the entire field of general surgery is covered in a systematic fashion, emphasis being placed on diagnosis and treatment. Third year, first trimester 1 hour a week, second and third trimesters 2 hours a week, 55 hours. *Dr. Sherman.*

302. **SURGICAL PATHOLOGY.** An attempt is made to correlate the second year course in pathology with clinical surgery. Pathological material removed at operations is examined and the student is taught to interpret the clinical course of the disease in the light of the pathological evidence. For scheduled hours see **EXPERIMENTAL MEDICINE.**

\*On active duty with U. S. Army.

303. **SURGICAL ANATOMY.** A course in applied anatomy in which, by lectures, recitations and cadaver dissections, an endeavor is made to correlate the knowledge of anatomy previously gained with clinical surgery. Third year, second trimester, 2 hours a week, 22 hours. *Dr. Henry.*

304. **SURGICAL TECHNIQUE.** A practical course intended to teach the essential principles of surgical technique. The students, under constant supervision, perform standard operations on experimental animals observing strict aseptic precautions. All operations are done under ether anesthesia. The students aid in the pre-operative preparation of instruments and supplies. Third year,  $\frac{1}{3}$  of class, 4 hours a week, 44 hours. Repeated each trimester. See also **ANESTHESIOLOGY** 302. *Dr. Henry.*

305. **MINOR SURGERY.** A course in diagnosis and treatment of ambulatory surgical cases given in the out-patient department. In consultation with the instructors the student examines and prescribes for the patients and does the required dressings. Third year,  $\frac{1}{3}$  of class, 10 hours a week, 110 hours. Repeated each trimester. *Drs. Sherman, Henry and Resident Staff.*

306. **DIAGNOSTIC CLINICS.** A series of bedside clinics with small groups of students, in which emphasis is placed on a systematic method of procedure and an orderly interpretation of data, in surgical diagnosis. Third year,  $\frac{1}{3}$  of class, 2 hours a week, 22 hours. Repeated each trimester. *Dr. Sherman.*

401. **SURGICAL CLINICS.** Formal bedside clinics attended by the entire fourth-year class, in which selected cases are presented by the students to whom they have been assigned, followed by a general discussion of the case and a critical analysis of the diagnosis and treatment. Fourth year, first and second trimesters 1 hour a week, third trimester 2 hours a week, 44 hours. *Drs. W. W. Battey, Chaney, Rhodes and Sherman.*

402-3. **CLINICAL CLERKSHIPS.** One third of the fourth-year class serve as clinical clerks on the surgical service for one trimester. All patients admitted to the public ward on this service are assigned in rotation to these students. They are required to make routine histories, physical examinations and laboratory tests; to record their diagnosis and suggested therapy. They maintain a close contact with the patient during his hospitalization and serve as operative assistants in operations on patients assigned to them. Daily ward rounds, with bedside discussions, are made. *Drs. Sherman, Henry and Resident Staff.*

404. **MINOR OPERATIVE SURGERY.** The students in small groups, have the opportunity to participate in the minor surgical procedures on patients in the out-patient department. This work is done in the operating rooms of the out-patient department. Fourth year,  $1\frac{1}{6}$  of class,  $\frac{1}{2}$  trimester, 3

hours a week, 16 hours. Repeated twice each trimester. *Dr. Sherman and Resident Staff.*

405. ACCIDENT ROOM SERVICE. In order to make the accident room material available for teaching purposes, each member of the fourth-year class is offered the opportunity of spending one week in attendance in the accident room, where he assists the Resident Staff in the treatment of these cases. The hospital provides special living quarters immediately adjacent to the accident rooms. Fourth year. Students assigned in rotation. *Resident and Visiting Staffs.*

406. CLINICAL PATHOLOGICAL CONFERENCE. See Pathology 401.

407. SURGICAL RESEARCH. The facilities of the experimental surgical laboratory and the public wards are available to any properly qualified individual who desires to carry on the investigation of a surgical problem. *Drs. Sherman and Henry.*

## ANESTHESIOLOGY

DR. P. P. VOLPITTO, *Professor.*

201. INTRODUCTION TO ANESTHESIOLOGY. Theories, stages and signs of anesthesia are taught, with a brief outline of the various agents employed. The course forms a part of course 202 in the department of Physiology and Pharmacology. Second year, second trimester, 4 hours. *Dr. Volpitto.*

301. PRINCIPLES OF ANESTHESIOLOGY. A course of lectures covering the principles of inhalation, regional, rectal and intravenous anesthesia, therapeutic block and gas therapy. Third year, first trimester, 1 hour a week, 11 hours. *Dr. Volpitto.*

302. PRACTICAL ANESTHESIOLOGY. A course given in conjunction with Surgery 304, Surgical Technique. Open drop ether is employed on experimental animals. Pre-medication, stages, signs and technique of administration of inhalation anesthesia are studied in a practical manner. The roles of oxygen and carbon dioxide in anesthesia are observed. The recognition and treatment of shock, hemorrhage, drug overdosage and asphyxia are stressed. Third year,  $\frac{1}{3}$  of class, 4 hours a week, 44 hours. Repeated each trimester. *Dr. Volpitto.*

401. CLINICAL ANESTHESIOLOGY. Observation of actual anesthesia in the operating rooms. Students may be allowed to administer anesthesia under strict supervision. Pre and post-anesthesia ward rounds are made. This course is in conjunction with the clinical clerkship in Surgery. Fourth year. Students assigned in rotation, each receiving approximately one week's service. *Dr. Volpitto.*

## DERMATOLOGY AND ONCOLOGY

DR. G. T. BERNARD, *Clinical Professor*

DR. IRVINE PHINIZY, *Assistant Clinical Professor*

DR. W. H. ROBERTS, *Assistant Clinical Professor*

DR. R. M. REIFLER, *Clinical Instructor*

301. PRINCIPLES OF DERMATOLOGY. A recitation and lecture course based on a standard textbook. Third year, 1 hour a week, third trimester, 11 hours. *Dr. Phinizy.*

302. CLINICAL DERMATOLOGY. A course in practical instruction in the diagnosis and treatment of dermatological diseases, given in the out-patient department. Third year, 1/6 of class, 1/2 of trimester, 2 hours a week, 11 hours. Repeated twice each trimester. *The Staff.*

401. CANCER CLINIC. Opportunity is offered students to observe the method of diagnosis, treatment and follow-up of cancer cases by attendance at the weekly cancer conferences at which patients are presented for group study and discussion. Fourth year, 1/3 of class, repeated each trimester, 1 hour a week, 11 hours. *Drs. Bernard, Roberts and Attending Staff.*

## NEUROLOGIC SURGERY

\*DR. R. F. SLAUGHTER, *Professor*

201. NEUROLOGIC PHYSICAL DIAGNOSIS. Instruction and clinical demonstrations in the principles of neurologic diagnosis. Special emphasis is given to the physiologic and neurologic anatomy in relation to the diagnosis of diseases of the central nervous system. Second year, third trimester, 1 hour a week, 11 hours. *Dr. Slaughter.*

301. NEUROLOGIC SURGERY. An endeavor to give the students an understanding of the principles employed in the diagnosis of neuro-surgical conditions and of the pathology involved. Special emphasis is also given to the care of cranial trauma. Third year, third trimester, 2 hours a week, 22 hours. Given in conjunction with Neurology 301. *Dr. Slaughter.*

302. OUT-PATIENT CLINIC. The students participate in the examination and treatment of ambulatory patients. For scheduled hours see NEUROPSYCHIATRY 302.

401. CLINICAL NEURO-SURGERY. This course is given in conjunction with the course in clinical clerkship. By ward rounds and clinical conferences the students are given personal instruction in the diagnosis and treatment of neuro-surgical cases. Fourth year, 1/3 of class, 1 hour a week, 11 hours. Repeated each trimester. *Dr. Slaughter.*

\*Deceased July 4, 1941. Successor to be appointed.

## OPHTHALMOLOGY, OTO-LARYNGOLOGY AND ENDOSCOPY

DR. C. I. BRYANS, *Clinical Professor*  
DR. S. J. LEWIS, *Clinical Professor*  
DR. W. E. MATTHEWS, *Assistant Clinical Professor*  
DR. J. V. ROULE, *Assistant Clinical Professor*  
DR. C. M. KILPATRICK, *Clinical Assistant*  
DR. R. E. LEONARD, *Clinical Assistant*

301. PRINCIPLES OF OPHTHALMOLOGY AND OTO-LARYNGOLOGY. Instruction in these branches is given by means of didactic lectures, clinical lectures and demonstrations. Diseases of the organs of special sense are taught in a systematic way, special attention being paid to pathology and diagnosis. Third year, second and third trimesters, 16 hours. *Drs. Bryans, Lewis, Kilpatrick and Matthews.*

401. CLINICAL SURGERY. A course in which by means of ward rounds and operative clinics the surgical treatment of diseases of the eye, ear, nose and throat is presented. Fourth year,  $\frac{1}{2}$  of class, 1 hour a week, 11 hours. Repeated each trimester. *The Staff.*

402. CLINICAL. A service in the out-patient department where practical training in diagnosis and treatment of the diseases of the eye, ear, nose and throat is given. Fourth year  $\frac{1}{6}$  of class,  $\frac{1}{2}$  trimester,  $4\frac{1}{2}$  hours a week,  $24\frac{1}{2}$  hours, Repeated twice each trimester. *The Staff.*

403. ESOPHAGOSCOPY AND BRONCHOSCOPY. A course in which, utilizing patients in the hospital and out-patient department, the student is familiarized with the place which bronchoscopy and esophagoscopy occupy in diagnosis and treatment. Fourth year. Elective. *Dr. Matthews.*

## ORTHOPEDIC SURGERY

DR. H. M. MICHEL, *Clinical Professor.*

DR. C. G. HENRY, *Associate Professor.*

DR. PETER B. WRIGHT, *Associate Clinical Professor.*

301. PRINCIPLES OF ORTHOPEDIC SURGERY. A systematic lecture and recitation course covering the general field of orthopedic surgery. Third year, first and second trimesters, 17 hours. *Dr. Wright.*

401. CLINICAL ORTHOPEDIC SURGERY. A clinical period once a week. This time is devoted to operative clinics, ward demonstrations and informal lectures. Fourth year,  $\frac{1}{3}$  of class, 2 hours each week, 22 hours. Repeated each trimester. *Drs. Michel, Wright and Henry.*

402. CLINICAL OUT-PATIENT ORTHOPEDIC SURGERY. Under instructions of the Staff the student is taught diagnosis and treatment of ambulatory orthopedic conditions. Fourth year,  $\frac{1}{6}$  of class,  $\frac{1}{2}$  of trimester,  $1\frac{1}{2}$  hours a week, 8 hours. Repeated twice each trimester. *Drs. Michel, Wright and Henry.*

403. FRACTURES. A didactic and practical demonstration course. The student is quizzed on the principles of fractures and cases are shown to illustrate the underlying pathology. Fourth year, entire class, 1 hour a week, first and second trimesters, 22 hours. *Dr. Wright.*

404. FRACTURE CLINIC. A follow-up clinic for fractures. The usual methods of treatment are demonstrated and discussed. Fourth year,  $\frac{1}{6}$  of class,  $\frac{1}{2}$  of trimester,  $1\frac{1}{2}$  hours a week, 8 hours. Repeated twice each trimester. *Drs. Michel, Wright and Henry.*

## ROENTGENOLOGY

DR. L. P. HOLMES, *Clinical Professor*

401. ROENTGENOLOGY. Instruction is given in the underlying principles of X-Ray technique. The students are instructed in the roentgenological interpretation of a large number of practical cases, covering the field of roentgen diagnosis and a number of patients are shown under the fluoroscope, as a follow-up after the clinical diagnosis. Instruction is also given in the principles underlying roentgen therapy. Fourth year, entire class, 1 hour a week, second trimester, 11 hours. *Dr. Holmes.*

## UROLOGY

DR. J. R. ROBERTSON, *Clinical Professor*

DR. G. W. WRIGHT, *Assistant Clinical Professor*

DR. T. W. GOODWIN, *Assistant Clinical Professor*

DR. J. Z. MCDANIEL, *Assistant Clinical Professor*

301. PRINCIPLES OF GENITO-URINARY SURGERY. A systematic lecture and recitation course is given to cover fundamental principles in the general field of genito-urinary surgery. Third year, first and second trimesters, 1 hour a week, 22 hours. *Drs. Goodwin and McDaniel.*

401. CLINICAL GENITO-URINARY DISEASES. Practical training in the diagnosis and treatment of genito-urinary diseases including cystoscopy is given throughout the year in the out-patient department. Fourth year, 1/6 of class, 1/2 of trimester, 3 hours a week, 16 1/2 hours. Repeated twice each trimester. *Drs. Wright, Goodwin and McDaniel.*

402. WARD ROUNDS AND OPERATIVE CLINICS. This course is devoted to the discussion of the diagnosis and treatment of genito-urinary diseases and the demonstration of diagnostic procedures. The student has an opportunity to observe the removal of ureteral calculi by cystoscopic manipulation, litholapaxy under visualization, and the transurethral removal of bladder neck obstruction by electro-resection. The out-patient department and the free wards supply ample material for this work. Fourth year, 1/3 of class, 2 hours each week, 22 hours. Repeated each trimester. *Drs. Robertson, Wright, Goodwin and McDaniel.*

## OBSTETRICS AND GYNECOLOGY

- DR. RICHARD TORPIN, *Professor of Obstetrics and Gynecology*  
DR. JOSEPH AKERMAN, *Professor of Obstetrics*  
DR. ANDREW J. KILPATRICK, *Professor of Clinical Obstetrics*  
DR. E. A. WILCOX, *Professor of Clinical Gynecology*  
DR. J. W. THURMOND, *Associate Professor of Clinical Obstetrics*  
DR. M. P. AGEE, *Assistant Professor of Clinical Gynecology*  
DR. W. A. CLARK, *Clinical Assistant*  
DR. MELVIS O. CORBITT, *Clinical Assistant*  
DR. V. H. HANDY, *Clinical Assistant*  
DR. F. N. H. HARRISON, *Clinical Assistant*  
DR. A. MILLER, *Clinical Assistant*  
DR. C. M. MULHERIN, *Clinical Assistant*  
\*DR. A. K. TEMPLES, *Clinical Assistant*

The courses have been arranged to impart a fundamental knowledge of the anatomy, physiology and pathology, and of the principles of diagnosis and treatment in obstetrics and gynecology. Every effort is made to correlate the two branches.

Third year students in the main are given didactic instruction; while in the fourth year the student is afforded opportunity for further application in ward rounds, pathologic and operative clinics; also in out-patient clinics for gynecology, prenatal and postnatal care. In addition he attends more than thirty obstetric cases in the home, keeping written histories and making postpartum visits, besides attendance upon hospital cases.

301. OBSTETRICS. Lecture recitations and manikin demonstrations on the physiology of pregnancy and labor. Third year, 2 hours a week, 66 hours. *Drs. Akerman and Torpin.*

301-a. PRINCIPLES OF GYNECOLOGY. A recitation and lecture course in the principles and practice of gynecology. Third year, 1 hour a week for the entire year, 33 hours. *Dr. Torpin.*

302. OBSTETRICAL CLERKSHIP. During the third year each student is assigned from eight to ten cases for complete history, physical examination, and laboratory work, followed by attendance of the case while in the hospital, including assistance at delivery. The student records his observations of delivery and is quizzed about each case. *Drs. Torpin, Akerman, Thurmond and Resident Obstetrician.*

303. OUT-PATIENT PRENATAL CLINIC. Students in the third year class are divided into groups of six and are in attendance three afternoons per week for five and one-half weeks. Practice is afforded in history taking,

*\*On active duty with U. S. Army.*

abdominal examination and auscultation, and pelvimetry. Many pathological conditions are found and discussed. Third year, 1/6 of class, 1/2 of trimester, 4½ hours a week, 25 hours. Repeated twice each trimester. *Drs. Torpin, Akerman and Staff.*

401. LECTURES AND CLINICS ON PATHOLOGICAL OBSTETRICS. Ward cases in the hospital are used for this course. Fourth year, 1 hour a week, 33 hours. *Drs. Kilpatrick, Torpin and Thurmond.*

402. HOME DELIVERY SERVICE. For this course the fourth-year class is divided into pairs, each student being in attendance for thirty cases. The two students alternate in delivering cases, being supervised for the first eight deliveries by one of the staff, and calling for consultation from the staff in all pathological conditions or complications. Case histories are prepared and submitted together with data for birth certificates on the cases attended. Entire twelve months. *Drs. Akerman, Torpin and Staff.*

402-a. WARD ROUNDS. Presentation of gynecological conditions both pre- and post-operatively, together with ample opportunity for the student to examine the patients. Fourth year, 1/3 of class, 2 hours a week, 22 hours. Repeated each trimester. *Dr. Torpin.*

403. OPERATIVE OBSTETRICS. Throughout the year arrangements are made whereby students are allowed to attend certain major operations. *Visiting and Resident Hospital Staff.*

404. OPERATIVE GYNECOLOGY. This course allows the student to become familiar with the different operative procedures most common in gynecological surgery. One student is allowed to assist with each operation, the remainder of the group observing. Fourth year, 1/3 of class, 1 hour a week, 11 hours. Repeated each trimester. *Drs. Torpin, Wilcox and Agee.*

405. ADVANCED GYNECOLOGY. This course is designed to refresh the student's knowledge of the surgical pathology attendant upon gynecological and obstetrical conditions. The course includes demonstrations of gross pathology. Fourth year, 1 hour a week, 33 hours. *Drs. Torpin and Wilcox.*

406. CLINICAL GYNECOLOGY. Opportunity is afforded the students for diagnosis and treatment of ambulatory gynecological conditions seen in the out-patient department. This course includes one afternoon devoted to postoperative gynecologic clinic and to the granuloma clinic; also one afternoon in the gynecologic endocrine clinic. Fourth year, 1/6 of class, 1/2 of trimester 7½ hours a week, 41 hours. Repeated each trimester. *Drs. Torpin, Wilcox and Staff.*

407. MOTHERS' HEALTH CLINIC. This enables the student to become familiar with contraceptive methods as demonstrated in the out-patient department. Fourth year, groups of four. The clinic is held on Thursdays from 3-4:30 p.m. *Dr. Corbitt.*

## EXPERIMENTAL MEDICINE

DR. ROBERT GREENBLATT, *Professor*

DR. FRANK MORTARA, *Research Fellow*

MR. L. Q. HAIR, *Research Assistant*

MR. R. R. SACKLER, *Research Assistant*

The department is a subdivision of gynecology and obstetrics but aims to cooperate with the other departments for the experimental and clinical investigation of problems in medicine. Facilities for laboratory endocrinology and animal experimentation are maintained. Particular stress is directed toward the investigation of the newer venereal diseases and experimental gynecology.

The following courses are given by its staff, in conjunction with the staffs of the departments of pathology, surgery, gynecology, and medicine.

301. **SURGICAL PATHOLOGY.** An attempt is made to correlate the second year course in pathology with surgery. Pathological material removed at operations is examined grossly and microscopically. Special stress is placed on fresh gross pathology. The student is taught to interpret the clinical course of a disease in the light of the pathological evidence. Third year, second and third trimesters, 1 hour a week, 22 hours. *Dr. Greenblatt.*

302. **ENDOCRINOLOGY.** See Medicine 301-a. *Drs. Lee and Greenblatt.*

401. **GRANULOMA CLINIC.** The students participate in the diagnosis and treatment of patients with chancroid, granuloma inguinale and lymphogranuloma venereum. Fourth year. See Obstetrics and Gynecology 406. *Drs. Mortara, Greenblatt and Torpin.*

402. **GYNECOLOGIC ENDOCRINE CLINIC.** A clinic for the study and treatment of gynecologic endocrine disorders in which the students assist in diagnosis and treatment. Fourth year. See Obstetrics and Gynecology 406. *Drs. Greenblatt and Torpin.*

501. **SPECIAL GYNECOLOGIC PATHOLOGY.** A course by arrangement for the advanced graduate student intending to specialize in obstetrics and gynecology. One hour a week. *Dr. Greenblatt.*

## GRADUATING CLASS, 1940-1941

## ELECTIONS TO MEMBERSHIP IN ALPHA OMEGA ALPHA

## Class of 1941

Elected during Third Year 1939-1940:

JAMES FREDERIC MADDUX

WILLIAM FRANK MCKEMIE

Elected during Fourth Year 1940-1941:

BERT AVERA, JR.

JOE DENTON COMBS

HERMAN KESSLER MOORE

## Class of 1942

Elected during Third Year 1940-1941:

WILLIAM HERBERT BONNER

WILLIAM SEABORN BOYD

## FOURTH YEAR CLASS, 1941-1942
